Leopard

The leopard embodies elegant perfection in combination with highest performance and precision. He announces a time of change and uses his strength to overcome obstacles and successfully break new ground.

His stamina and outstanding skills make him the ideal godfather for our high-performance touchpanels.

The range of touchpanels extends from the small 7“device to the 22” display. For every project you will find the right panel with the required performance and operating system. It does not matter whether you prefer Windows or Android for your visualization projects. DIVUS offers you elegant and wall-mounted touch panels for your individual wishes and ideas.

An advantage of permanently installed touch panels: they are always powered up, are always traceable and reliably on hand whenever they are needed.

In addition, DIVUS touch panels are not designed exclusively for building control, they are rather multi-function panels for controlling the building functions, are intercom indoor stations, IP CAM Viewer, Multiroom Control Center and much more.

The elegant panels stay discreetly in the background. No matter whether you opt for the white or black version in landscape or portrait format.

DIVUS®
Show it. Control it.

TOUCHPANEL

Everything under control

DIVUS Touchpanel

DIVUS TOUCHZONE 15

DIVUS panels are timeless and of the highest quality. They fit into any environment and visualize your building with DIVUS OPTIMA in an elegant and intuitive way. You will surely find the right panel for every project. The product range extends from the small 7" up to the 22" device. DIVUS touch panels also provide the necessary performance and design for your visualization project.

But why should you opt for a wall mounted touch panel?

„Smart-Devices", such as smartphones or tablets are an comfortable extension of a building visualization. However, access to important and relevant building functions must be realized by means of a fail-safe and stable DIVUS touch panel, which has been developed for continuous operation and can not be misplaced, forgotten or lost. Touch panels manage and control the functions of your home, without neglecting any safety-relevant requirements. Protected functions such as turning on/off of the alarm system or the opening of the entrance door must not - especially not exclusively - be handled by mobile devices with the risk of getting into the hands of strangers.

„Wall-mounted touch panels represent SECURITY, RELIABILITY and continuous AVAILABILITY."

For every application

For private or professional use

In our product portfolio, you will find the right solution for your home or working area. From touch panels for building automation, door intercom systems and the complete system KNX CONTROL you will find the right solution for your needs and requirements.

DIVUS stands for Aesthetics & Design, Control, Security and Simplicity!

A DIVUS wall-mounted touch panel expresses your personal style. Whether it is an elegant, restrained or stylishly eye-catching decorative frame, you'll be sure to find a solution that suits your tastes. It is not only the way touch panels look that is so impressive, but also their performance and functionality. Regardless of whether your DIVUS touch panel is designed for use in an apartment, single-family/multi-family dwelling, townhouse or villa, you can count on finding a model that delivers optimal performance.

The other major use to which DIVUS building panels can be put is in the commercial domain, i.e. hotels, offices, medical practices, stores, spas, health clubs, bars/restaurants, warehouses, factories, reception areas, and cruise ships (cabins and public areas).

Efficient, small operating units can also control complex office building. In such settings, our touch panels can also be used, apart from the building automation control, to display product presentations and/or surveillance camera images (e.g. in high-end stores), and as guidance system.

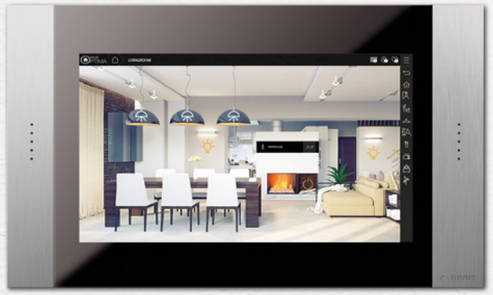
DIVUS TOUCHZONE 7

New quality of life

Feel at home



DIVUS SUPERIO 15

Times are changing. And security, control and monitoring of the home is getting more and more important in order to sleep peacefully and enjoy holidays far away from home. Since prevention is the best protection for the whole family and the house, DIVUS offers the integration of alarm systems, fire alarm systems and video systems.

When you grow older and slow down a bit, an intelligent building makes your life easier.

A smart home supports the people in all aspects of life and makes everyday life easier. Our credo is: „Technology should serve a person, not vice versa!“

A simple and intuitive operation, understandable control functions and variable-sized input objects support the needs of each generation. In order to be able to remain independent even in old age, the intelligent home serves not only as a helper, but also as a watchdog in an emergency. In unusual situations, warnings and alarms can be automatically sent to defined organizations or family members to detect and avert dangerous or unwanted conditions at an early stage.

A smart home means sustainable system security, innovation and future-proof investment. These are the best prerequisites for increasing quality of life, flexibility and safety. Therefore, intelligent building technology should now be an integral part of every electrical installation.

A smart electrical installation makes the life easier and saves time for important things. With a simple fingertip, you can close all windows, close the shutters, turn off all the lights and turn on the alarm system within a few seconds. This is just one of many scenarios that can be programmed. The building is adapted to the individual needs of the residents and turns into a place of well-being for the whole family.

DIVUS DIVUS offers you the right technology for your needs. DIVUS KNX CONTROL is a system for building visualization, which enhances the comfort and value of your property. It can be operated by anyone, whether young or old, everyone can handle it.

Security & Future

Always a good feeling

DIVUS CIRCLE

Energy efficiency

Saving energy made easy

DIVUS TOUCHZONE 15

Saving resources is a good thing not only for the environment, but also for your pocketbook. Carbon emissions can be reduced by up to 20 percent through the use of intelligent building technologies, which operate in intelligent homes without sacrificing comfort or making energy saving a nagging concern.

DIVUS provides an energy management system, which independently controls the intelligent home through a variety of sensors. The energy consumption of heating, cooling, shading, lighting, ventilation and power supplies is optimized by logical operations, therefore the energy costs can be dramatically reduced. The indoor climate constantly adapts to the needs of the residents while reducing the energy consumption and increasing the well-being considerably. Increasing numbers of functions are bundled and components are subject to overarching control systems in that window contacts are integrated in the heating control system. The nominal temperature is reduced at night or when the building is unoccupied, thus saving energy. Room lighting and temperature are automatically adjusted as weather conditions change. This means that not only is light intensity adjusted, but also color harmony is varied according to the time of day and personal perceptions, thus providing particularly comfortable living room lighting.

Entertainment

Exactly as you like it …

Start well informed in a successful day. With a DIVUS touch panel, you are always up-to-date with RSS feeds, exchange dates, sports results, the latest weather reports and many other relevant information.

For a perfect entertainment you can integrate a multiroom audio system into your building automation system. With a DIVUS touch panel, you have access to your music library all over the house. Play different music in different rooms at the same time, or the same music in all rooms. Wake up with your favourite song in the bedroom, drink a coffee listening to the radio news in the kitchen and take a bath listening to your „chill-out" play list.

DIVUS TOUCHZONE

The Synergy Touch

GERMAN DESIGN AWARD SPECIAL 2017

PLUS X AWARD 2015 achieved for: High Quality, Design, Ease of Use, Functionality

Display 17,8 cm (7") - 25,7 cm (10") - 39,6 cm (15") - 47 cm (19")

DIVUS TOUCHZONE is the product innovation for more comfort and security in every smart building.

DIVUS TOUCHZONE has undergone a redesign. Design as well as function has been reconsidered and renewed. The elegant and restrained design of the DIVUS TOUCHZONE is anything but obtrusive, a characteristic that surely endears the device to the hearts of architects and interior designers. The frame is filigree and elegant. The round home button is based on the new launcher design.

It can be installed in portrait or landscape format. The panel hangs like floating on the wall, with a 3mm thick glass (black or white) protruding from the wall.

The inner values of DIVUS TOUCHZONE are also impressive: it is full of great performance and new features that only become apparent at second glance.

The new Launcher overcomes by its soft round lines. The built-in clock widget gives the user even more customization options.

DIVUS TOUCHZONE is a:

- glass multi-touch panel for an intuitive handling in residential and commercial buildings
- dedicated screen for controlling temperature, lighting, shading and more
- home-audio control panel
- an elegant interior intercom station
- control panel for energy and security management of the building
- artwork for the wall - Made in Italy
- call system for office, surgery, conference room...

DIVUS TOUCHZONE enables to implement your ideas and visions with Android.

DIVUS APPS

With DIVUS OPTIMA, you connect the mobile world with your home. You can easily control and manage your smart home with a tablet or smartphone. The app works as a client software, which connects your DIVUS KNX CONTROL device and gives access to your KNX system.

With DIVUS VIDEOPHONE you can bring your building's intercom on your smartphone/ tablet. Receive door calls on the go and conveniently on your smartdevice. See who is standing in front of your door, talk to your guest and press the door opener, everything comfortable and mobile.

With DIVUS WORLD you can bring the DIVUS catalogs to life! Start the app and scan the catalog pages marked with the „DIVUS WORLD" icon. And you will discover the world of DIVUS with exciting videos and tutorials. Enjoy it on- and offline!

DIVUS APPS

Apps for DIVUS TOUCHZONE

EXKLUSIV

All apps on this page are specially designed for DIVUS TOUCHZONE. They make everyday life in Smarthome easier and more comfortable.

The DIVUS LAUNCHER app is the main app of DIVUS TOUCHZONE and can be understood as start screen / main graphical interface of the product. The DIVUS LAUNCHER app shows a simple grid of 6 fields that permit a quick access to the most important functions / apps.

DIVUS KIBRO is the perfect application for everyone that wants to visualize web contents in full screen mode. Actually it is a small kiosk browser app, which provides a set of options for configuration. Special about DIVUS KIBRO is the integrated cache management.

Mit dem DIVUS MÜLLPLANER vergessen Sie nie wieder den Müll rechtzeitig vor Ihr Haus zu stellen. Die App gibt Ihnen die Möglichkeit einfach und intuitiv den Überblick über die wichtigsten Termine zu behalten. Dank der Erinnerungsfunktion entgeht Ihnen in Zukunft kein Termin mehr.

With the DIVUS IP CAM VIEWER you always know what is happening in and outside your building. The app allows easy access to your installed IP cameras. Additionally, screenshots can be made and saved in a simple way.

The app DIVUS SCREENCLEANER disables the touch function of the display for 30 seconds. At the same time a small „animation" and a countdown is displayed, during which time the glass front of the touch panel can be cleaned without risk of unintentional operation.
