DIVUS

DIVUS CIRCLE

A VISION BECOMES REALITY

DIVUS had a vision – with an irrefutable belief in itself and its ability, DIVUS pursued this vision on the long path to **perfection** and expressed it in **DIVUS CIRCLE**. The result far exceeded our expectations. The combination of the timelessly reduced design and

the innovative features forms a smart device of the highest sophistication and exclusivity.

DIVUS CIRCLE is the **ideal fusion of form and function** – it has become visible perfection.

„Our design process began with the search for the extraordinary, an appearance that leaves the mass of ever-similar products behind while meeting the taste of the crowd.

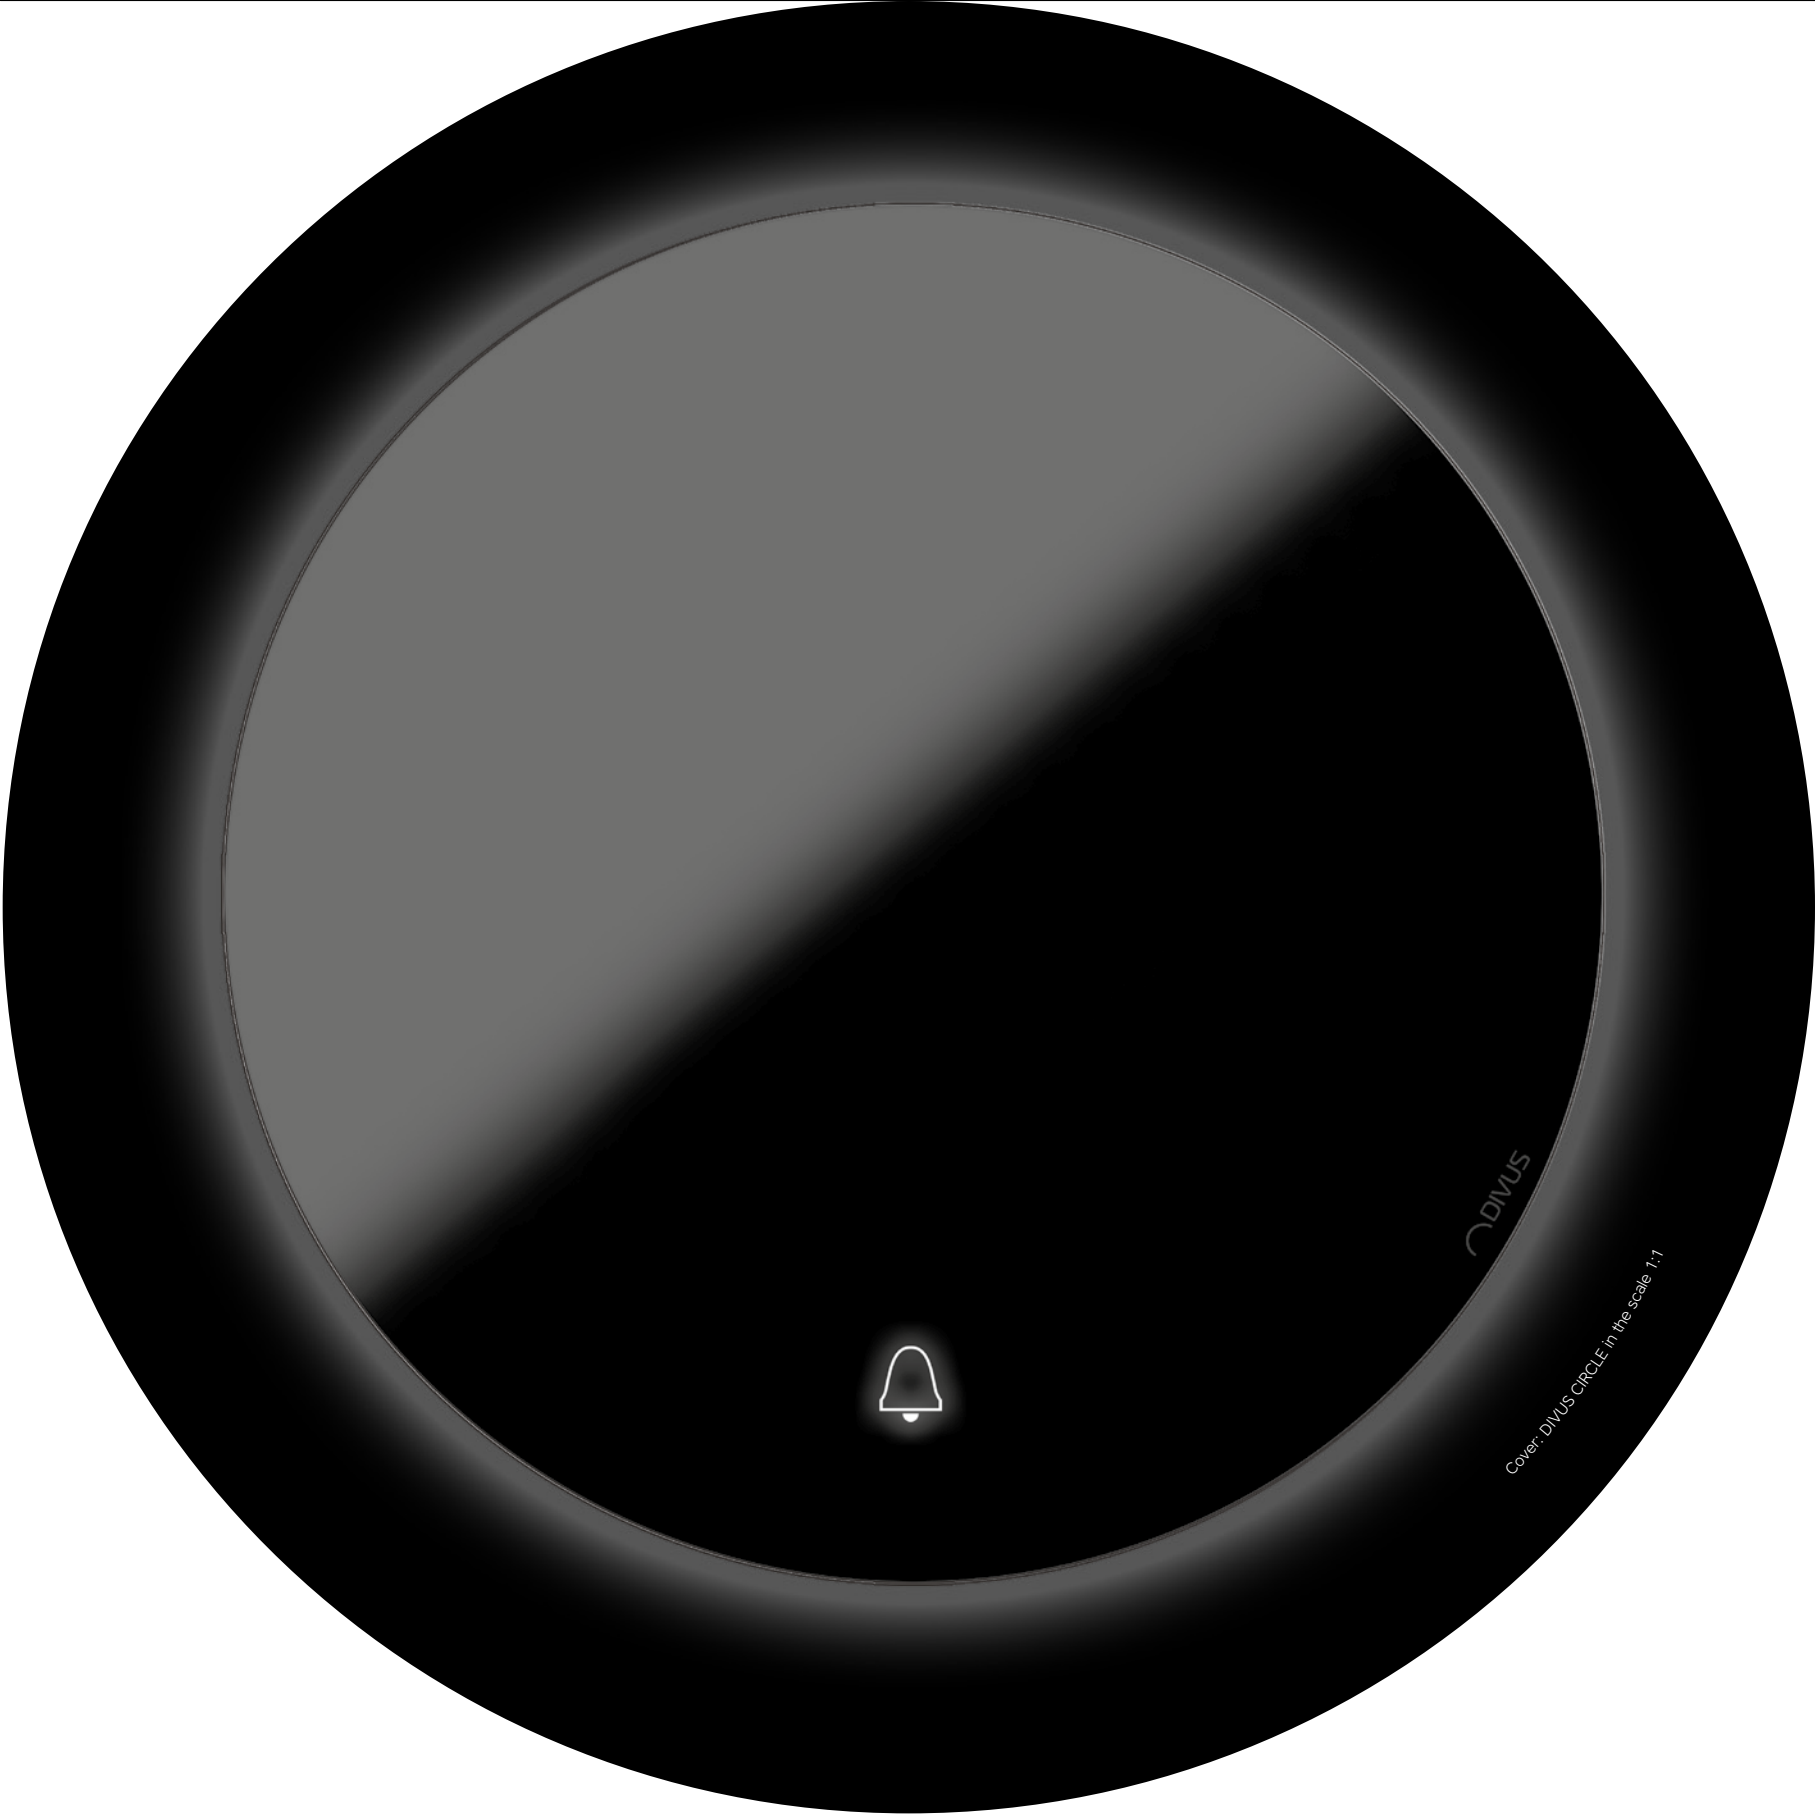

A form that welcomes the user directly at the front door, at the gate, or at the internal reception and communicates through its changeability on different levels. The answer was the CIRCLE.

Almost magical, like an aura, the backlight shines at dusk. The soft lighting brightens the entrance area and provides an unobtrusive additional security and serves as a guide.

DIVUS CIRCLE automates everyday functions in an individual way and provides security and transparency in an ever-changing environment.“

Christian Zanzotti, Designer

DIVUS CIRCLE

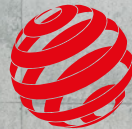

AWARD-WINNING & EXCELLENT

The judges were of the same opinion: form and function unite in a unique way to **DIVUS CIRCLE**.

It is **door station**, **video surveillance**, **wall lamp** and **digital bodyguard** and butler all-in-one – the optimal product at your front door.

DIVUS CIRCLE has won several prestigious awards:

Not only the **exceptional shape**, an appearance clearly different from the competition and setting new standards, but also the **smart features** and the easy and **intuitive operation** of the product are honored.

INNOVATION

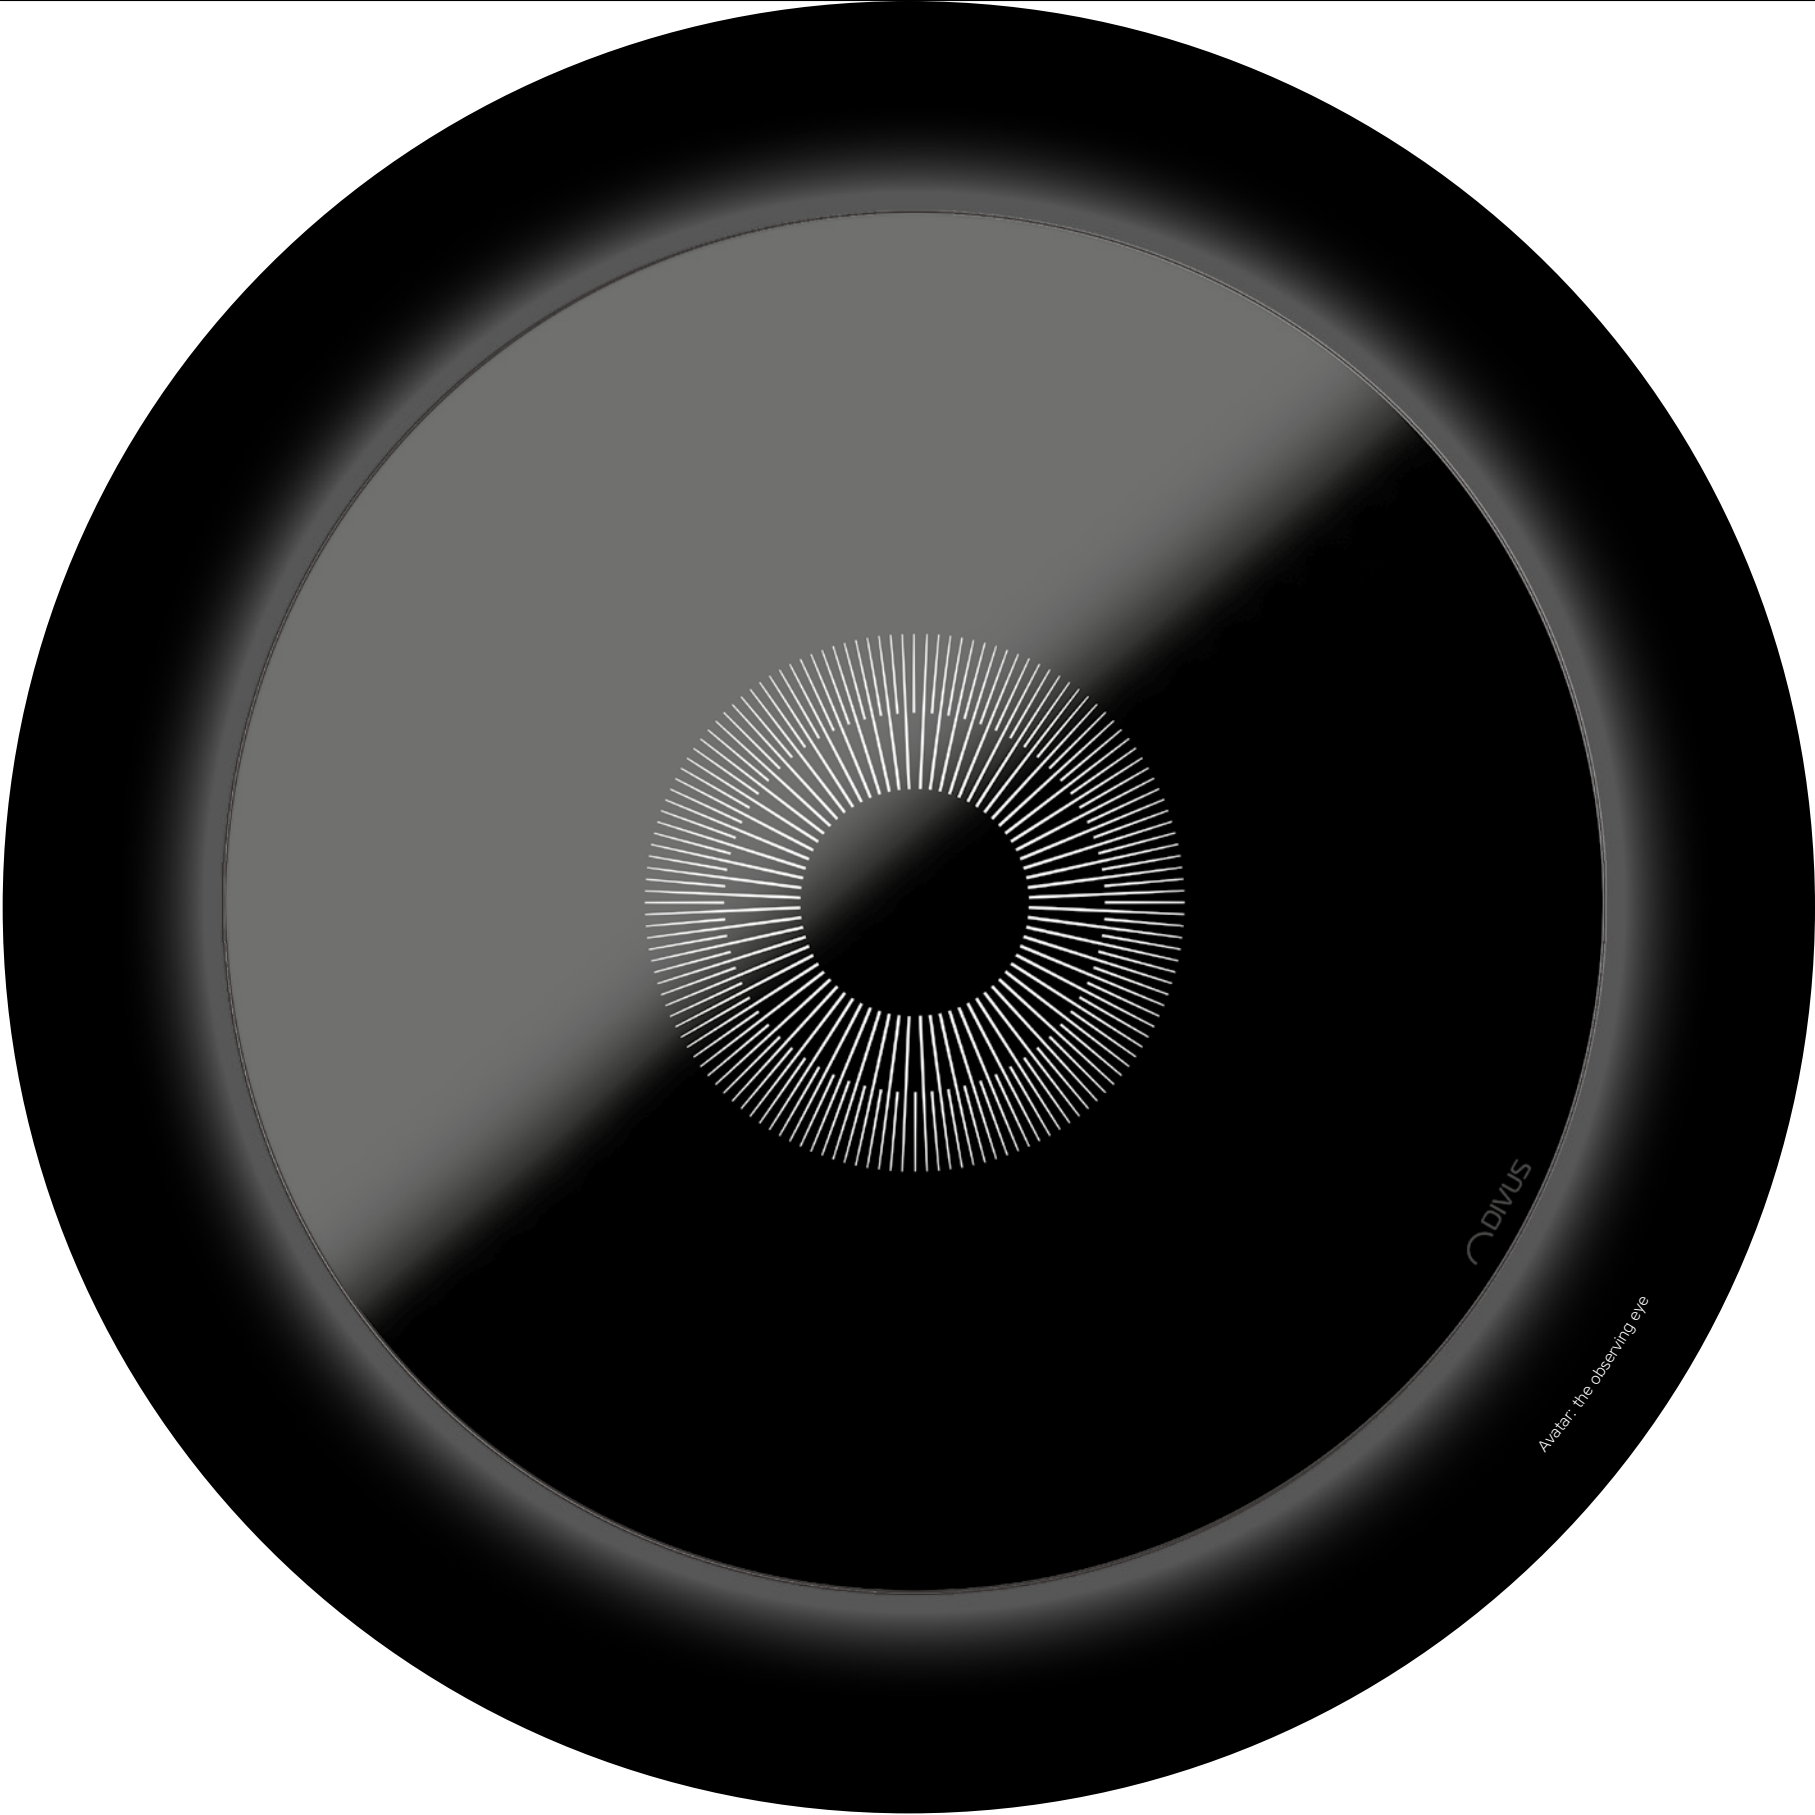

The classic features of the doorbell are being upgraded, ushering in a new era of door intercom systems. This **video intercom system** convinces with its **innovative aesthetics** and the **modern technology**. A smart building can now be recognized right at the front door.

DIVUS CIRCLE is equipped with a **camera** with day and night vision, as well as a fisheye lens. **Speaker** and **microphone** with echo cancellation guarantee **perfect**

call quality even with loud street noise.

DIVUS CIRCLE becomes a digital butler that is omnipresent and always available, reliably accepting and passing on messages. At the same time it is your **personal butler** and guard of your house. Guests are greeted, skeptically observed or decidedly rejected, depending on preset preferences and scenarios chosen by the resident.

EASY & INTUITIVE

The integrated **LCD touch display** guarantees optimal usability of the innovative features of **DIVUS CIRCLE**. The **user interface** has been designed to be intuitive and **easy to use** and this for both the homeowner in the configuration, as well as for the visitor in daily use. The user interface is designed so that the color scheme

and the dashboard information can be **configured** by the homeowner according to their **personal taste**. The use of **DIVUS CIRCLE** by the visitor is characterized by **continuous feedback**. The intercom interacts with the guest, which makes you feel comfortable with every action you are taking.

BUTLER & BODYGUARD

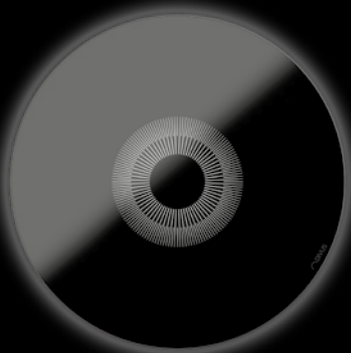

Thanks to a **proximity sensor**, **DIVUS CIRCLE** awakens when sensing movement. An **individual avatar** appears, which acts as a digital butler, greeting or „observing“ visitors.

The homeowner can make these settings himself in advance through a convenient and intuitive configuration, depending on personal preferences and needs, e.g. day or night time, vacations. He chooses between the **predefined profiles** „Friendly“, „Skeptical“

and „Bodyguard“.

If the integrated infrared motion detector reacts, the avatar leaves its place to the selected dashboard showing informations such as address, family name and/or street number. The **homeowner decides for himself** how much he wants to display.

DIVUS CIRCLE takes on the tasks of a reliable and ubiquitous **butler and protector** in a modern and **pioneering way**.

THE PERFECT COMBINATION

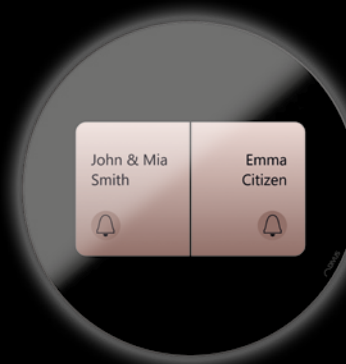

APPLICATION

DIVUS CIRCLE is extremely versatile: from **single-family homes** and **villas** to **apartment buildings** and **office towers** – the size of the property is not an issue for **DIVUS CIRCLE**. In large, complex residential buildings and office towers, the touch display enables the placement of all names or residential parties in telephone book look. The necessary data can be

displayed and selected with convenient and commonly known gestures. The **SIP-based DIVUS CIRCLE** on request makes photos of any visitor which can be saved temporarily. **DIVUS CIRCLE** is equipped with an **RFID receptor**, which eliminates the need for a key. A **temporary access code** gives you the possibility to allow certain people exclusive access at predefined times.

WALL LIGHT

DIVUS CIRCLE is installed in the wall with his mounting box. Thanks to the **12mm thick wall structure**, the mounted **DIVUS CIRCLE** seems like a weightless **floating object**. The glass hides the **powerful** and

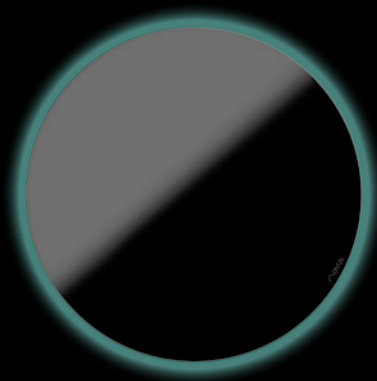

energy-saving RGB LED ring. It is designed so that it can function as a **full-fledged wall lamp**. The color of the LEDs can be set by the homeowner at will and wrap his entrance in a pleasant color.

INTERCOM-SOLUTION

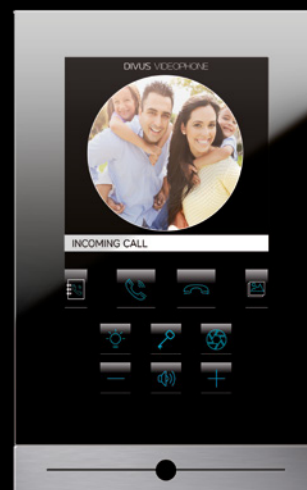

BUNDLE

In **combination** with the permanently installed touch panel **DIVUS TOUCHZONE** and the user interface **DIVUS VIDEOPHONE**, **DIVUS CIRCLE** is a complete and **innovative door intercom**. It is designed to provide

total comfort, increased security and elegant design. As a **complete system**, this innovative bundle sets **new standards** in integrated **building automation**.

DIVUS CIRCLE small

We like to call the **CIRCLE small** the **little brother** of the **DIVUS CIRCLE**. Despite the smaller external dimensions, it is as „big“ in hardly anything. It is a fully functional, **SIP-based video door intercom station** including **capacitive bell**, **camera**, **proximity sensor** and **RFID module**. **CIRCLE small** is available with or without **display**.

It is intended to be used as an **indoor unit** in apartment buildings, at side entrances or backdoors.

The rear LED ring shines in a **white, pleasant light**. It is strong enough to illuminate the entrance area independently. So **CIRCLE small** also makes a great figure as a full-fledged wall lamp.
